Certificate of Calibration

Manufacturer: Sensys Gatso Group

Model: T-Series with RT2

Antenna Serial Number: 202011005449

This speed measuring device has been tested and verified to be functioning in accordance with the manufacturer's specifications. Testing was performed using equipment traceable to the National Institute of Standards and Technology.

The calibration testing and verification procedure includes the following:

- a) The transmitter of this device has been tested and found to be within the prescribed limits of 24.050 Ghz to 24.250 Ghz for Type III and Type IV radar devices (K band) as established by the Federal Communications Commission (FCC) and IACP and, more specifically, within the limits of the 24.075Ghz to 24.175Ghz range approved by the FCC for this device.
- b) The four primary frequencies and eight sub-frequencies used by the transmitter are within the applicable tolerances specified by the manufacturer.
- c) Using the transmitter's internal signal generator at 35.5 mph the speed measuring device is certified accurate within +/- 1 mph.
- d) The relative transmit power, peak power angle and beam width are within the applicable tolerances specified by the manufacturer.
- e) The unit has been physically inspected and determined to be in good condition.

Calibration was performed under direction of **Heinz Stubblefield**.

Signed, Heinz Stubblefield
